

FactoryMation Unveils FMX PML Series Digital Panel Meters

New Digital Panel Meters Available in Seven Model Variations

Canton, GA – September 5, 2017 – FactoryMation introduces the FMX PML Series Digital Panel Meters. PML Series panel meters are 72x72mm and feature a 53x57mm LCD display with three user-defined backlight colors chosen by use of the free PML Series Configurator Software. Positive or Negative backlight display can be chosen at time of purchase. Each meter is UL Type 4 and IP66 rated for indoor/outdoor use with an operating temperature range of 14° to 140°F. A separate starburst 4-digit display area is included for customized information display. There are seven unique panel meter options available: Amp, Process, CT, Volt, Frequency, Multi-Meter, and Shunt meters. Starting at \$74, the FMX PML Series Panel Meters are just another example of FactoryMation's commitment to offering an unmatched value for industrial control and automation products.

Seven variations of meter ensure that the PML Series has an answer to a wide range of meter needs. The Amp Meters feature an input range of 0 to 5A (AC/DC), and the top of this range increases as high as 1000A with external CT. Process Meter input ranges from 0 to +/- 10V or 0-50mA. These meter interfaces process sensors and transducers, and this includes 20-point linearization. Process Meters boast the greater between within 0.01% accuracy of signal or 5uA. CT Meters range from 0 to 5A AC increased to 10,000A AC with external CT. These models operate with a 0.5% accuracy. Volt Meters from the PML Series have an input range of 0 to 600V AC/DC and an accuracy of 1%. Frequency Meters range in input from 2 to 400Hz or 0 to 600VAC and feature frequency monitoring and speed capabilities. These models operate within 0.1% accuracy. AVF Multi Meters combine the functions of amp, volt, and frequency meters into one unit with an input range of 100 to 240VAC. Finally, the Shunt Meters range in input from 0 to 1V DC. The shunt meter accuracy is whichever is greatest between 0.1% or 0.5mV.

FactoryMation is a nationwide supplier of industrial control products including AC drives, Motors and Motor Controls, Enclosures, HMIs, PLCs, Sensors, and more. Through the cultivation of direct relationships with world-class manufacturers from across the globe, FactoryMation offers competitive pricing on high-quality industrial-grade products. Over 40,000 products are strategically stocked at their distribution center near Atlanta, Georgia and other conveniently located third-party warehouses ensuring that orders ship promptly and arrive when needed. Knowledgeable customer support is available to assist with product selection to make sure you get the items that best fit your application requirements. When considering product quality, availability, delivery, price, and support, you will see FactoryMation is committed to offering an unmatched value and why they should be your go-to source for industrial control and automation products. Orders can be made quick and easy via online, phone, email, or fax. For more information or to request a catalog see www.factorymation.com or call 1-800-972-0436.
