

## New Wiring Solutions Offered at FactoryMation

### *FMX Wiring Solutions Introduced*

**Canton, GA – January 26, 2017** – FactoryMation has introduced new Wiring Solutions from FMX. New options include DIN-rail terminal blocks, DIN rails, cable ties, wire ferrules, crimp terminals, and cord grips. The new FMX terminal block selection includes feed-through, ground, double-level, and disconnect terminals. A variety of DIN-rail options including RoHS compliance are available in three different materials and ranging from 5.5mm to 15mm high. Cable ties include many size options as well as material such as UV resistant black nylon. Wire ferrules and crimp terminals are offered in single or twin wire options with a variety of colors and sizes. Cord grips are UL listed, offer NPT thread options, and come in two nylon colors as well as many metal cord grip options. Wiring products feature very competitive prices and are sold in multi-piece packs. FMX Wiring Solutions are just another example of FactoryMation's commitment to offering an unmatched value for industrial control and automation products.

FactoryMation is a nationwide supplier of industrial control products including AC drives, Motors and Motor Controls, Enclosures, HMIs, PLCs, Sensors, and more. Through the cultivation of direct relationships with world-class manufacturers from across the globe, FactoryMation offers competitive pricing on high-quality industrial-grade products. Over 40,000 products are strategically stocked at their distribution center near Atlanta, Georgia and other conveniently located third-party warehouses ensuring that orders ship promptly and arrive when needed. Knowledgeable customer support is available to assist with product selection to make sure you get the items that best fit your application requirements. When considering product quality, availability, delivery, price, and support, you will see FactoryMation is committed to offering an unmatched value and why they should be your go-to source for industrial control and automation products. Orders can be made quick and easy via online, phone, email, or fax. For more information or to request a catalog see [www.factorymation.com](http://www.factorymation.com) or call 1-800-972-0436.
