FactoryMation Expands Selection of Power Supplies

New IMO BPS Series Slim Line DIN Rail Power Supplies Available

Canton, GA – November 2018 – FactoryMation announces a new series of slim line DIN rail power supplies by IMO Precision Controls. These BPS series power supplies are UL- and cUL-listed as well as CE certified. Models range from 15W to 240W and offer 12V or 24V DC outputs. Each power supply offers a single-phase universal 90-264VAC input power range. This power supply series also offers short circuit, overvoltage, overcurrent and over-temperature protection and back-up parallel connections. IMO BPS industrial duty power supplies start at \$21 and offer a three-year warranty. All of these features and pricing add up to a product value that is hard to beat.

FactoryMation is a nationwide top supplier of many quality industrial control products including Enclosures, AC Drives, Motors and Motor Controls, Relays, Sensors, and more. With an expansive distribution hub that houses over 40,000 products along with affiliates located nationwide, FactoryMation offers prompt shipment of a vast selection of products. Ordering is quick and easy with 5 convenient methods: online web store, phone, email, fax, or mail. FactoryMation offers many value-added services to assist consumers in the tasks associated with the industrial controls industry and are backed by a knowledgeable support staff for all customer service and application needs.
