

For Immediate Release

Catch the IMO FireRaptor at FactoryMation

FactoryMation Offers Solar Panel Rapid Shutdown Solution

Canton, GA – January 29, 2019 – FactoryMation now carries the new IMO Precision Controls FireRaptor, a solar panel rapid shutdown solution designed for emergency responder safety and National Electrical Code (NEC) compliance. The NEC 2017 Edition, fully in effect as of January 1, 2019, significantly changed the requirements for solar panel rapid shutdown. NEC 2017 now requires that conductors be de-energized following rapid shutdown. The means of rapid disconnect must be located within 12 inches of the solar panel, allowing fire fighters and first responders to safely navigate the structure during an emergency. The IMO FireRaptor, rated for 700W with IP68 NEMA 4X protections, meets the NEC 2017 standards and is suitable for controlling one string (two panels) while remaining compliant. This rapid shutdown solution is easy to install and easy to use, requiring no setup and including both hardwire and mobile communication alarm signaling capability. The FireRaptor features three shutdown methods: manual shutdown, automatic shutdown at 185°F, and automatic shutdown due to power loss. Starting at \$68, the IMO FireRaptor is just another example of FactoryMation's commitment to offering an unmatched value for industrial control and automation products.

FactoryMation is a nationwide supplier of industrial control products including AC drives, Motors and Motor Controls, Enclosures, HMIs, PLCs, Sensors, and more. Through the cultivation of direct relationships with world-class manufacturers from across the globe, FactoryMation offers competitive pricing on high-quality industrial-grade products. Over 40,000 products are strategically stocked at their distribution center near Atlanta, Georgia and other conveniently located third-party warehouses ensuring that orders ship promptly and arrive when needed. Knowledgeable customer support is available to assist with product selection to make sure you get the items that best fit your application requirements. When considering product quality, availability, delivery, price, and support, you will see FactoryMation is committed to offering an unmatched value and why they should be your go-to source for industrial control and automation products. Orders can be made quick and easy via online, phone, email, or fax. For more information or to request a catalog see www.factorymation.com or call 1-800-972-0436.
