

## IMO Precision Controls IEC Limit Switches Now Available at FactoryMation

*FactoryMation Offers Heavy-Duty Industrial Limit Switches*

**Canton, GA – May 2018** – FactoryMation has launched a new line of IEC limit switches from IMO Precision Controls. These limit switches are for industrial applications and are available in three series: LR, LD, and LL. This line of switches starts at only \$18.00. Each series is UL Listed with Type 1, 12, 13, 4x and IP67 environmental protection ratings. LR, LD, and LL series limit switches feature double-break snap-action contacts and removable contact blocks which provide ease of wiring. Each series offers a variety of actuator options such as roller levers, coiled spring, and more. Matched with FactoryMation's continued commitment to excellent customer and product support and free same-day shipping, the IMO IEC limit switches offer a tough-to-beat value.

The LR, LD, and LL IEC limit switches are all appropriate for industrial applications but vary in their construction. The LR series switches have a single-entry design and are contained in a technopolymer housing that makes them double-insulated. The LD and LL series switches offer heavy-duty metal housings. The LD features a single conduit entry. The LL series has three conduit entry points for convenient wiring options.

FactoryMation is a nationwide top supplier of many quality industrial control products including Enclosures, AC Drives, Motors and Motor Controls, Relays, Sensors, and more.
