

For Immediate Release

FactoryMation Adds IMO Push Fit Terminal Blocks

FactoryMation and IMO Make Wiring Easy

Canton, GA – January 25, 2019 – IMO Precision Controls Push Fit Connection DIN Rail Terminal Blocks are now available from FactoryMation. Offering faster wire connections with no tools required, these terminal blocks reduce both wiring time and difficulty. The Push Fit connection style comes in six different terminal block types. A wide variety of colors are available for feed-through terminals, and ground terminals feature green and yellow marking for easy identification. Starting at \$26, IMO's Push Fit Terminal Blocks are just another example of FactoryMation's commitment to offering an unmatched value for industrial control and automation products.

FactoryMation is a nationwide supplier of industrial control products including AC drives, Motors and Motor Controls, Enclosures, HMIs, PLCs, Sensors, and more. Through the cultivation of direct relationships with world-class manufacturers from across the globe, FactoryMation offers competitive pricing on high-quality industrial-grade products. Over 40,000 products are strategically stocked at their distribution center near Atlanta, Georgia and other conveniently located third-party warehouses ensuring that orders ship promptly and arrive when needed. Knowledgeable customer support is available to assist with product selection to make sure you get the items that best fit your application requirements. When considering product quality, availability, delivery, price, and support, you will see FactoryMation is committed to offering an unmatched value and why they should be your go-to source for industrial control and automation products. Orders can be made quick and easy via online, phone, email, or fax. For more information or to request a catalog see www.factorymation.com or call 1-800-972-0436.
