## IMO and FactoryMation Deliver for Solar

*New IMO Products Geared for Solar Industry and Available at FactoryMation*

**Canton, GA – January 26, 2019** – FactoryMation has added an array of products from IMO Precision Controls geared towards the solar industry. Designed for use in a photovoltaic (PV) system, these new products include Safe-Lock DC Disconnects/Isolators, DC Contactors, and PV-rated DIN Rail Terminal Blocks. IMO's Safe-Lock Disconnects are available in two-, four-, six-, and eight-pole models with a wide range of mounting options available and start at \$29. The rotary "knife-contact" mechanism in these disconnects is self-cleaning, vibration resistant, and highly reliable, and their patented Safe-Lock handle offers an additional "LOCKABLE OFF" position. Starting at \$216, DC Contactors are UL508i and serve as a rapid shutdown solution for solar systems. These contactors can be wired to AC power grids for shutdown of grid supply. Three- or four-pole devices are available with ratings up to 450A. Finally, IMO's PV-rated Terminal Blocks are DIN rail-mountable and feature screw clamp terminals designed especially for use in PV applications. These Terminal Blocks start at \$57. IMO's PV-rated DC Contactors, DC Disconnects/Isolators, and PV Terminal Blocks are just further examples of FactoryMation's commitment to offering an unmatched value for industrial control and automation products.

FactoryMation is a nationwide supplier of industrial control products including AC drives, Motors and Motor Controls, Enclosures, HMIs, PLCs, Sensors, and more. Through the cultivation of direct relationships with world-class manufacturers from across the globe, FactoryMation offers competitive pricing on high-quality industrial-grade products. Over 40,000 products are strategically stocked at their distribution center near Atlanta, Georgia and other conveniently located third-party warehouses ensuring that orders ship promptly and arrive when needed. Knowledgeable customer support is available to assist with product selection to make sure you get the items that best fit your application requirements. When considering product quality, availability, delivery, price, and support, you will see FactoryMation is committed to offering an unmatched value and why they should be your go-to source for industrial control and automation products. Orders can be made quick and easy via online, phone, email, or fax. For more information or to request a catalog see [www.factorymation.com](http://www.factorymation.com) or call 1-800-972-0436.
