

For Immediate Release

Saginaw ENVIRO-THERM Air Conditioners Available at FactoryMation

Reliable Choice for Environment-Safe and User-Friendly Air Conditioners

Canton, GA – January 24, 2019 – FactoryMation is proud to announce the addition of Saginaw Control & Engineering's ENVIRO-THERM air conditioners. Designed for indoor and outdoor application with an internal closed-loop system, these air conditioners are a rugged and reliable thermal management option. The ENVIRO-THERM line is UL Types 3R, 4, 4X, and 12 Recognized. A variety of powder-coated steel or stainless-steel models are available including 115, 230, and 460VAC ratings and from 1,800 to 14,000 BTU. The entire line includes programmable controllers with digital touchpads, flange handles, and door-activated switch provisions for easy operation and installation. In addition to its ease of installation and great features and ratings, Saginaw's ENVIRO-THERM air conditioners use an environment-friendly R134a refrigerant. Starting at \$1,372.40, ENVIRO-THERM air conditioners are just another example of FactoryMation's commitment to offering an unmatched value for industrial control and automation products.

FactoryMation is a nationwide supplier of industrial control products including AC drives, Motors and Motor Controls, Enclosures, HMIs, PLCs, Sensors, and more. Through the cultivation of direct relationships with world-class manufacturers from across the globe, FactoryMation offers competitive pricing on high-quality industrial-grade products.
