

FMX expands relay product line

FactoryMation announces FMX's recent relay product line expansion

Canton, GA – February 8, 2016 – FactoryMation announces FMX's recent relay product line expansion to now include pushbutton and encapsulated multi-function timing relays.

FMX pushbutton timing relays offer ten timing functions with pushbuttons to allow for easy and precise time setting. A wide range of time settings are available from 50ms to 999 hours. Additional features of FMX pushbutton timing relays include: a 10A DPDT contact rating, LED status indicators, and simplified installation through the use of an 11-pin octal socket. Priced from \$54.

FMX encapsulated multi-function timing relays offer four timing functions with an onboard potentiometer for time settings. An encapsulated cover provides protection against harsh environments. A wide range of time settings are available from 0.1s to 100 minutes. Additional features of FMX encapsulated multi-function timing relays include: a 10A SPDT contact rating, LED status indicators, and flexibility of use with customer supplied external potentiometer. Priced from \$38.
